Course Description and Purpose

Anthropologists study the diversity of human expression, including the meanings, practices, behaviors, and systems that manifest in different societies and cultures. This course is designed to introduce you to the discipline of sociocultural anthropology, including how social scientists collect, analyze, and interpret data to gain insights into

particular aspects of our social world. The class introduces students to concepts and debates central to the discipline, including cultural relativism, fetishism, nostalgia, tradition, hegemony, globalization, and neoliberalism.

Course Goals

This class is a part of the University Core Curriculum.

This course satisfies the following University Core Curriculum requirement for Social Science Group Two (university-required):

- Students will demonstrate the ability to examine behavioral, social, and cultural issues from a variety of points of view.
- Students will demonstrate an understanding of basic social and behavioral science concepts and principles used in the analysis of behavioral, social, and cultural issues, past and present, local and global.

Student Learning Outcomes/Objectives

Student learning outcomes allow faculty to assess the level of proficiency in content knowledge and skills that their students acquire in a course.

If the objective meets a special designation, you will see the code after the objective:

University Core Curriculum: UCC

Gordon Rule Writing: GRW

Global Learning: GL

Civic Literacy: CL

- • Acquire knowledge of the study of cultural expression and approaches to study culture in a global context
- • Learn key concepts and theories in anthropology, including the strengths and weaknesses of each

- • Understand the methods involved in the production of social scientific knowledge
- Generate research questions that lead to meaningful inquiry;
- • Show knowledge of conventions of academic research, including the ability to locate, evaluate, and document sources and to incorporate sources effectively into their work
- • Learn how to practically apply social scientific knowledge to real world problems

Assessments

In order to mitigate any issues with your computer and online assessments, it is very important that you take the "Practice Quiz" from each computer you will be using to take your graded quizzes and exams. It is your responsibility to make sure your computer meets the minimum hardware requirements.

All assessments will auto-submit when (1) the timer runs out OR (2) the closing date/time is reached, whichever happens first. For example, if a quiz has a closing time of 5:00 pm but the student begins the exam at 4:55 pm, the student will only have 5 minutes to complete the quiz.

Assessments in this course are not compatible with mobile devices and should not be taken through a mobile phone or a tablet. If you need further assistance please contact FIU Canvas Help Team.

Course Communication

Communication in this course will take place via the Canvas Inbox. Check out the [Canvas Conversations Tutorial](#) or [Canvas Guide](#) to learn how to communicate with your instructor and peers using Announcements, Discussions, and the Inbox. I will respond to all correspondences within 24 hours.

Technical Requirements and Skills

One of the greatest barriers to student success is a lack of basic computer literacy. By computer literacy, we mean being able to manage and organize computer files efficiently and learning to use your computer's operating system and software quickly and easily. Keep in mind that this is not a computer literacy course, but students enrolled in online courses are expected to have moderate proficiency in using a computer. Please go to the [What's Required webpage](#) to find out more information on this subject

State General Education Course Description and Outcomes

This course aligns with the state-mandated course description and student learning outcomes specified below.

ANT 2000 - Introduction to Anthropology

In this course, students will learn the foundations of anthropology as the study of human variation in its biological, social, and cultural dimensions. Students will learn about anthropological concepts, principles, and methodologies to understand and explore past and present human behavior. They will apply the anthropological approach to analyze issues pertaining to past and contemporary cultures, and develop intellectual skills and habits to understand behavioral, social, and cultural issues from multiple disciplinary perspectives.

Student learning outcomes:

- Students will explain scientific approaches to the study of human variation and human origins, including primatology, extinct and extant human cultures, language, and ethnicity. Students will explain the origins of anthropology as a foundation discipline in the social sciences that examines the nature and definition of culture.
- Students will apply anthropological concepts, principles, and methods to the scientific study of past and present human behavior.
- Students will explain how anthropology incorporates multidisciplinary knowledge and perspectives.
- Students will describe contemporary anthropological contributions.
