## **COURSE DESCRIPTION AND PURPOSE**

Anthropologists study the diversity of human expression, including the meanings, practices, behaviors, and systems that manifest in different societies and cultures. This course is designed to introduce you to the discipline of sociocultural anthropology, including how social scientists collect, analyze, and interpret data to gain insights into particular aspects of our social world. The class introduces students to concepts and debates central to the discipline, including cultural relativism, fetishism, nostalgia, tradition, hegemony, globalization, and neoliberalism.

Keep in mind that this is not a computer literacy course; but students enrolled in online courses are expected to have moderate proficiency using a computer.
